

Angelo Ferrillo

PHOTOGRAPHER - TEACHER - ART DIRECTOR

Born in 1974, designer and photography lover since adolescence, I moved from Naples to Milan to continue my primary work as a Project Manager, after studying Engineering. Following the primary courses at the Academy of Forma Photography (Contrasto), I completed my photographic studies with a Masters in Photojournalism, a Masters in Photoediting and Iconographic Research, and a Masters in photographic curating.

In 2014, I joined the Board of AFIP International (International Association of Professional Photographers), also becoming Vice President. My photography was defined by Giovanni Gastel as "a careful look at what people have inside".

Juror and President of the Jury for national and international competitions, winner of various photographic competitions at national and international level as well, I am mainly dedicated to the evolution of photographic language and vision, with both in-depth and targeted studies.

Finally, in the years I developed my expertise as a photography teacher at IED and RAFFLES academies in Milan, iconographic research and editing teacher for Creative Campus, street photography teacher at Officine Fotografiche Milano, Leica Akademie teacher, photographic planning and documentation teacher at Foto Scuola Lecce, for which I am also coordinator and didactic director.
